Welcome

About our Institute

In the year 1984, a group of dedicated and like-minded visionaries headed by Sri R L Jalappa, a champion of the Cooperative movement in the state of Karnataka established the Sri Devaraj Urs Educational Trust for Backward Classes with the focus on provisioning of Medical Education and Social Services.

The Ministry of Human Resource Development, Government of India conferred 'Deemed to be University' status to the Sri Devaraj Urs Academy of Higher Education and Research under Section 3 of UGC Act 1956 on 25th May 2007 (vide letter No. F.9-36/2006-U 3(A) dated 25th May 2007). The lush green campus of the University is spread over an area of more than 72 acres of land and houses the medical college, hospital, administrative offices, University and affiliated departments, canteens, and hostels. Currently, the University has two faculties of studies, namely, the Faculty of Allied Health and Basic Sciences and the Faculty of Medicine.

About Scientific Conclave

Translational Research is a rapidly growing discipline in biomedical research. It aims to expedite the discovery of new diagnostic tools and treatments by using a multi-disciplinary, highly collaborative, "bench-to-bedside" approach. This interdisciplinary collaborative science is essential to better understand disease pathophysiology and develop therapies to improve health and quality of life.

The need for Translational Research arises as there are many compelling reasons to find cost-effective solutions to healthcare delivery. Increased complexity in biomedical research has distanced the laboratory from clinical scientists, and thus there is a need for clinical scientists who can serve as facilitators of the translational process. In this regard, the Department of Research and Development Cell of SDUAHER planned to conduct the conference to narrow this gap and facilitate the researchers and clinicians to exchange ideas, seek expert inputs, and develop solutions to improve the quality of mankind.
