The resource persons of the workshop, highlighted the importance of reference management in academic work and explained how Mendeley can streamline the citation process and facilitate literature organization. The workshop provided step-by-step instructions on how to create in-text citations and a list of references using Mendeley. Participants learned how to integrate Mendeley with popular word processing software and generate citations and bibliographies in different citation styles.

OBJECTIVES:

2. Mendeley simplifies the process of citing sources by integrating with word processing software. It allows users to generate citations and bibliographies in various citation styles.
