The workshop commenced with an invocation song, prompting all attendees to rise from their seats. Dr. KNV Prasad initiated the first session of the day, providing a comprehensive introduction to blueprinting. Dr. K N V Prasad enriched the event with an insightful talk on blueprinting and competency-based education during the third session. Following a brief tea break, participants engaged in hands-on training focused on developing blueprints. Dr. K N V Prasad guided them through various types of blueprints, highlighting their significance in formative and summative assessments. Subsequently, Dr. Ashwini K Shetty delivered a concise yet impactful session on Examples of formative and summative assessment blueprints, capturing the audience's attention. The concluding session, led by Dr. KNV Prasad, explored the application of blueprints in clinical assessment. This session included more hands-on training and an affinity mapping group activity, ensuring continued participant engagement. Finally, Dr. Vinutha Shankar M S, summarized the workshop and concluded the session. Post-sessions, feedback was collected through a Google Form, and the overall response was positive. Participants appreciated the well-structured content, hands-on training, and the engaging activities that enhanced their understanding of blueprints in educational assessments.
