Workshop on

**“Basic NRP Provider Course”
for MBBS Interns**

Department of Paediatrics

In association with
Indian Academy of Paediatrics

Date: 23rd August, 2024

Venue: CCSS (Skill Lab), SDUAHER

About the Program

Ninety percent of newborn babies make the transition from intrauterine to extra uterine life requiring little or no assistance to begin spontaneous and regular respirations. Approximately 10% of newborns requires some assistance to begin breathing at birth and only about 1% may need extensive resuscitative measures to survive. Yet, birth asphyxia is a leading cause of mortality and morbidity in newborns and in India it contributes towards one fifth of all neonatal deaths. These deaths can be averted by proper antenatal and intrapartum care along with correct technique and steps of neonatal resuscitation. Hence, this workshop.

After completion of the course, the participants should be able to:

- Assess a newborn baby at birth.
- Perform resuscitation of a newborn baby using standard equipment.
- Provide aftercare if a baby requires help with its breathing at the time of birth.
