**BASICS IN ENDOSURGERY- A
RESIDENT'S PERSPECTIVE**

FRIDAY 18th OCTOBER 2024

**DEPARTMENT OF SURGERY
SRI DEVARAJ URS MEDICAL COLLEGE
KOLAR - 563101**

**VENUE - LIBRARY 1ST FLOOR AV HALL,
SDUMC KOLAR.**

Dear Colleagues and Residents,

Minimally invasive techniques, such as laparoscopic and robotic-assisted surgery, are now more common, reducing the need for large incisions and allowing for quicker recovery. These innovations, combined with improved perioperative care, are driving a revolution in abdominal surgery, resulting in safer, less invasive, and more effective treatments for patients.

This is the first of a kind all resident CME to be conducted, helping the budding surgeons develop an interest in academic programs.

We the Department of General Surgery are organising a CME “**BASICS IN ENDOSURGERY- A RESIDENT’S PERSPECTIVE**” which will help the participants to understand the future of surgery.

We are pleased to welcome all participants to this interactive session

Learning Objectives:

Gastrointestinal surgeries would focus on developing expertise in complex procedures, mastering minimally invasive techniques, and managing complications. Mastering of advanced surgical techniques and intraoperative decision making and problem solving.
