(57) Abstract :

ABSTRACT DEVICE TO STABILIZE REDUCED DISLOCATED CONDYLES The present disclosure relates to a device, more particularly an elastic bandage that can be used in maxillofacial surgery to stabilize reduced dislocated condyles. More particularly, the device relates to a self-adjustable elastic bandage which is characterized by its ability to provide retention and stability. The present disclosure allows adjustment of tension in the bandage by the user without any professional help and easy to fabricate.
