Assistant Professor
Department of pathology
Hassan institute of medical science**

ABOUT THE PROGRAMME

The Haemophilia is an inherited X- linked bleeding disorder characterized by deficiency of clotting factors VIII or IX leading to hemostasis and recurrent bleeding. This Awareness Program aims to raise awareness about bleeding disorders and promote early diagnosis, proper treatment and comprehensive care. The program brings together healthcare professionals, patients and the community to improve understanding and ensure better support and quality of life of individuals affected by these conditions. It also honours Frank Schnabel, founder of the world federation of haemophilia.
