Good Clinical Practice (GCP) are guidelines and standards for conducting clinical trials involving human subjects, established by the International Council for Harmonisation (ICH). Adherence to GCP ensures that clinical trials are conducted ethically, safely, and scientifically, facilitating development of new medical treatments and ensuring public trust in the research process.

Objectives:

1. Explain GCP guidelines for conduct of clinical trial
2. Explain the roles and responsibilities of ethics committee members
3. Explain the importance of informed consent process
