June marks Cataract Awareness Month,
dedicated to spreading knowledge about the
most common cause of vision loss worldwide.

Cataracts affect millions, often with age, but
can be effectively treated with surgery,
restoring clear sight and quality of life.

This month serves as a reminder to prioritize
regular eye exams and early detection,
crucial steps in preserving vision and
preventing blindness.

Cataract remains a significant cause of
blindness worldwide, both in urban and rural
populations, standing as the primary condition
after glaucoma.

It is estimated that cataracts affect millions
globally. In India, cataracts are a major public
health concern, affecting millions annually.

Despite cataract surgery being highly effective,
there is a significant backlog of patients
awaiting treatment, especially in rural areas.

Efforts are needed to expand access to surgical
services and raise awareness to reduce the
burden of preventable blindness.

In response to this challenge, we are organizing
a Guest lecture session aimed at educating
healthcare professionals and the public alike.

This initiative will serve as a practical
guideline, emphasizing early detection, timely
intervention, and accessible treatment options.

Etiology of Dementia

- Major concern in the coming years- age-related dementias such as AD
- Usually begins in the 7th decade of life (Sporadic AD)- APOE gene mutations and other risk factors
- Rarely seen in individuals younger than 65 years (genetic risk factors- APP, P51 and P52)-familial AD
- Sporadic is often caused due to multiple risk factors

Event Report of World Physiotherapy Day

Theme: Low Back Pain

World Physiotherapy Day, celebrated annually on September 8th, marks the founding of World Physiotherapy in 1951. This day highlights the unity and solidarity of the global physiotherapy community and recognizes the vital work physiotherapists do for their patients and communities. The theme for 2024 focuses on low back pain (LBP), emphasizing the crucial role of physiotherapy in its management and prevention. LBP is the leading cause of disability worldwide, affecting millions of people. Physiotherapists provide expert advice, treatment, and rehabilitation, helping patients improve their overall health, reduce the risk of future episodes, and support recovery. This day is an opportunity to raise awareness about physiotherapy's importance and promote the profession's contributions to health and well-being.

LBP is the leading cause of disability globally, affecting 619 million people in 2020. About 90% of cases are non-specific, meaning no single structure can be identified as the cause. Physiotherapists are crucial in providing expert advice, guidance, and treatment for LBP, improving overall health, reducing future episodes, and supporting recovery and independence. Regular physical activity and exercise are the most

effective treatments for LBP, with physiotherapists tailoring programs to individual needs to ensure patients remain active and engaged. Rehabilitation and education are crucial in all stages of low back pain (LBP), ensuring patients understand their pain and return to normal activities. Physiotherapists can provide education programs to empower patients with self-care strategies. Common warnings to protect the spine are unnecessary and should be dispelled, emphasizing that LBP rarely indicates serious tissue damage or life-threatening disease.

The event, organized by the College of Physiotherapy at R. L. Jallappa Hospital, commenced at 11:00 AM on 10th September 2024. Distinguished guests included Sri. J. Rajendra, Vice Chairman of SDUET, Hanumanth Raju K G, Secretary, Dr. Muni Narayana C, Registrar, Dr. Prabakar K, Principal, Dr. Aravind Natarajan, Dean, Dr. Krishnappa J, Medical Superintendent, Dr. Sendhil Kumar E, HOD, along with other department heads.

Following the inauguration, talks on World Physiotherapy Day were delivered by Dr. Prabakar, and Dr. Krishnappa, Sri. J. Rajendra, and Dr. Sendhil Kumar E. The chief guests then released a book on Low Back Pain.

The event also featured a mime performance by students on the topic of low back pain, followed by theratube exercises to raise awareness about physiotherapy and its significance. The event concluded with a vote of thanks by Dr. Likhit M (PT). Event pictures are attached below.
