**CME – on
“MINIMALLY INVASIVE
PROCTOLOGY”**

**30th September 2026
9.00AM – 4:00PM**

Venue: A. V. Hall, Library 1st Floor

Program Description

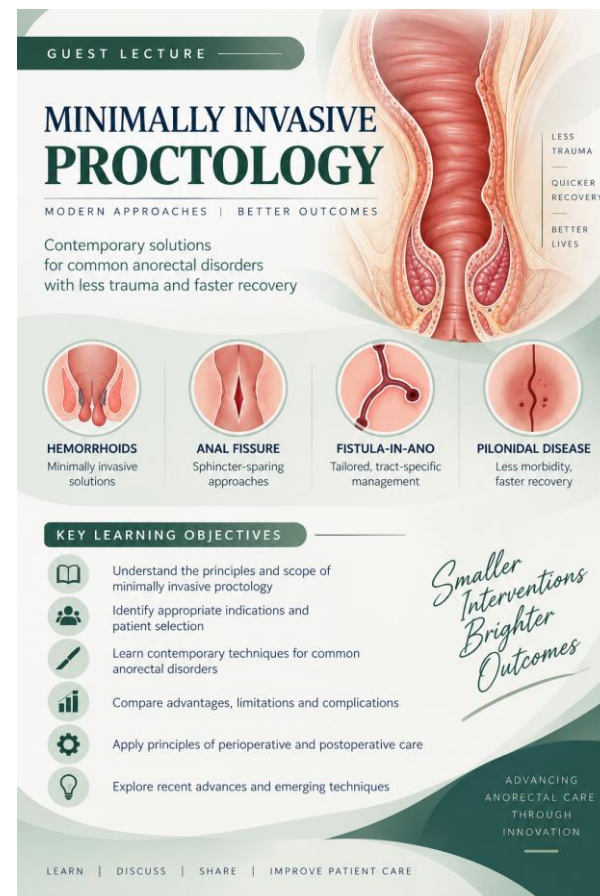

The CME on “Minimally Invasive Proctology” will provide an overview of contemporary advances in the management of common anorectal disorders using minimally invasive techniques.

The CME will focus on the principles, indications, patient selection, and current surgical approaches for conditions including hemorrhoids, anal fissure, fistula-in-ano, and pilonidal disease.

The scientific session will also highlight the recent developments in procedural techniques, perioperative management, postoperative recovery, and clinical outcomes, with emphasis on evidence-based practice.

The program aims to enhance the knowledge and understanding of postgraduate students, and practicing surgeons regarding evolving minimally invasive approaches in proctology.

The CME will be followed by an interactive quiz session designed to reinforce key concepts discussed during the scientific sessions through case-based questions, clinical scenarios, images, and recent advances in minimally invasive proctology.

**Hope this CME provides all the
essential inputs and invites good
interactive discussion.**
